

Notes for meeting

Hard parts of project

- Top navbar that stays at the top
 - https://www.w3schools.com/howto/tryit.asp?filename=tryhow_css_fixed_menu
- How to jump to a section of the page
 - <https://blog.hubspot.com/marketing/jump-link-same-page>
- How to have different images at the top
 - https://www.w3schools.com/w3css/w3css_slideshow.asp
 - The dots one is the best

Style web page

- minimalistic web page, highlighting the images
- Smaller details such as font, borders, and color scheme are left open ended
- Should have clear sections with different images headers for each section
 - These are the sections that the fixed nav bar should be able to jump to
